INTRODUCTION

1.

The Royal Netherlands Government has been supporting the Government of Andhra Pradesh with bilateral assistance in meeting the targets of the International Water supply, and Sanitation decade. The Netherlands Assisted Programme has covered in its first phase 201 villages in 6 districts, including 14 villages in Nalgonda District.

(annexure-1: list of villages under AP I)

- 1.2 Under phase-II, further 288 villages are being taken up in 4 districts. The present project (phase-III) proposes to cover 226 revenue villages including 337 hamlets in Nalgonda district and 137 revenue villages in Kanigiri area of Prakasam District. The focus is to be on fluoride affected and scarcity villages. The en-route villages are also being covered to ensure an area approach.
- This document is concerned with the Nalgonda Project, and specifically addresses itself to issues/strategies related to the invvolvement and participation of the community, particularly of the disadvantaged groups and especially of women, in the planning/implementation and maintenance of the water and sanitation inputs. The underlying assumption is that such human dimensions—can enhance the quality of the intervention as also ensure that the investments contribute to improved life standards.
- 1.4 The initial objective of the project was merely to provide water to the identified problem villages. It was thought that issues related to operation and maintenance and

community responsibility sharing etc., would take care of themselves. Subsequent evaluations by Review Mission fielded by the Royal Netherlands Government had pointed to the need for the conscious introduction of more comprehensive and multifaceted intervention efforts around water supply.

- The on-going second generation projects (AP-II) has the advantages of the participation of voluntary organisations and other governmental and non-governmental organisations who are charged with the responsibility for various support activities like health education, community participation, sanitation programmes, income generation and water quality monitoring. However since the introduction of these non-technical or rather people oriented activities were brought into the project as an after thought, they could not be properly dove-tailed into the programme.
- 1.6 In this third generation project care has been taken to integrate the technical and non-technical aspects right at the stage of formulation. It is hoped that this will considerably enhance both the efficiency and impact of community participation and hence of the project.
- 1.7 Bringing water from a source to the consumer is largely an engineering problem. But this activity has wider repercussiosns as entering into the affairs of a human community. It is a definite intervention into the development processes within the community. A community has

several aspirations and needs in any process of development — water supply is just one of them, even if very important.

The community has att.tudes and opinions, expressed/
unexpressed, towards the project. These should be
articulated and incorporated into the project. Community
participation must become an integral part of the project.

- also to the impropred health standards of the community. As such along with water environmental, domestic and personal hygiene/sanitation become an integral part of the project.

 Together with these, other needs of the community also has to be responded to, such as income generation.
- Assisted Projects office to participate in this project as the voluntary organisation responsible for community participation and health education, taking special care to see that the weaker sections of the community particularly women are actively involved. ASM has had several rounds of discussions with Netherlands Assisted Projects Office both before and during in the preparation of this document.
- 1.10 This document outlines the strategies ASM proposes to adopt in the implementation of the tasks entrusted to it. The document does not pretend to be a detailed operational plan. This can be developed only at a much later stage. However the document does spell out the strategies and institutional arrangements ASM proposes to adopt in organizing, motivating and involving the people in this ambitious water supply and sanitation project.

agencies to take up other support activities. The intervention by ASM envisages close interaction and cooperation with the nodal department - Panchyathi Raj Engineering Department and the other participating agencies like the A.P.Dairy Developement Cooperative Federation, Integrated Child Development Services, Health, Sericulture and Animal Husbandry Departments and the District Development Authorities, so that the programme may bring about an integrated and sustainable development of the community.

11 BACKGROUND INFORMATION ON ARTHIK SAMATA MANDAL (ASM)

- 2.1 ASM functions on the premise that man is not born to live in isolation, but is essentially a social entity, simultaneously independent and inter-dependent. The development of an individual is interwoven with that of the community and vice-versa.
- 2.2 But in reality, we find that whatever inputs we are able to make for increasing the production in an economy where disparity prevails, these are made use of by the rich, not only leaving the lower ones without their due share but also giving more power to the strong to exploit the weak. Thus the disparity is increasing between the rich and the poor in the villages, the rural and the urban in the country and between the developing and the developed nations in the

world. This widening gulf is the most dangerous portent of peacelessness resulting in consequences which can well be imagined.

2.3 Here we remember Mahatma Gandhi's dictum:

Recall the face of the poorest and the most helpless man whom you may have seen and ask yourself if the step you contemplate is going to be of any use to him. Will he be able to gain anything by it? Will it restore to him control over his own life and destiny? In other words will it lead to Swaraj or self rule for the hungry and also the spiritually starved millions? Then you will find your doubts and yourself melting away.

This fact has been the basic premise on which Mahatma Gandhi gave his call "unto this last" or "Antyodaya" and included economic equality as one of the pivotal works of his constructive programmes.

- 2.4 To give effect to this programme a body was formed in Vijayawada in the year 1952, under the leadership of Gandhiji's close associates, J.C.Kumarappa and GORA. They interpreted and lived on Gandhian principles of economic equality and were the life long crusaders for the dignity of common man.
- 2.5 Though this body remained unregistered, it worked for the promotion of Gandhian philosophy of "Antyodaya" and of Trusteeship.
- 2.5 During the Cyclone devastation of 1977 in Krishna District, the need was felt to register the Organisation to facilitate the undertaking of relief, rehabilitation and reconstruction work in the cyclone affected areas. The organisation was

formally registered in 1978 under the chairmanship of late Prabhakarji who was also a close associate of Mahatma Gandhi.

- 2.6 Mr. Veeraiah, the project holder, has been its Secretary ever since the Organisation was formerly registered in 1978. He has been associated with a number of Gandhian Organisations and with the "Sarvodaya" movement in India from the year 1957.
- 2.7 Copies of documents related to the legal status of the organisation are annexed.

(annexure II: Memorandum of Association and Bye laws)
(annexure III: Certificate of Registration)
(annexure IV: FCRA Registration)

2.8 Aims of the Organisation

- i. To undertake Gandhian constructive programmes aimed at relieving the people in general and the people in rural areas in particular from their existing poverty and to foster cultural and social development.
- ii. To develop selected villages into model villages through integrated socio-economic activities in the fields of agriculture, irrigation, animal husbandry, fisheries, environmental protection, education, women and child welfare, care for the aged.
- iii. To impart and promote scientific, secular, democratic and cosmopolitan outlook among the people and to make them better citizens by helping them to realise their responsibility to discharge their duties in society through various social, economic, educational and cultural programmes.

2.9 Activities

ASM has been working in Krishna District ever since the 1977 cyclone. Over the years its activities have grown from

relief, rehabilitation and reconstruction to a comprehensive development of the target villages. ASM is now working in 150 villages in the four districts of Krishna, Guntur, West Godavari and Nalgonda.

In Krishna district ASM is active in 105 villages. The main work is integrated rural development with emphasis on nonformal education, primary health care focusing on child nutrition/immunization, drinking water/sanitation, and income generation activities like agriculture, sericulture, weaving, horticulture, apiculture etc.. ASM relentlessly promotes education in the rural areas by providing supplementary nutrition and supplementary teaching to school-going children. A field office at Srikakulam and a suboffice at Koduru coordinate and support these activities.

ASM carries out similar activities in ten villages of Guntur district, in the Kolluru and Kollipara Mandals.

In West Godavari District, ASM activities are spread over in 20 villages with an office at Akivedu. The target population is the marginalised agricultural labourers, The programme is directed to child care, child nutrition, immunization, pre-primary education (Balwadis). In this area, several communities have no drinking water facilities (gwp) except the drainage canals. ASM has come out with mini slow sand filtration tanks (3000-6000 lts capacity) to solve this problem. The tanks are maintained by the users. ASM has constructed 20 such tanks.

In Nalgonda district ASM project is known as the Asman
Tribal Development Project. This work is concentrated in 25
Lambada tribal tandas. ASM has established 2 hospitals in
the area and a balwadi/primary school in each of these
tandas. Primary health with emphasis on mother and child
health, immunization, child nutrition, pre-primary and
primary and elementary education are the sailent features.
Income generation and human resource development programmes
are also included in this project.

ASM has a total full time staff of 250 persons and about 100 part timers. These persons are drawn from various fields of expertise such as community development, health, agriculture, sericulture, management and administration.

(annexure V: Organogram of ASM)

The various activities of ASM are supported by International Aid Agencies like Save the Children Fund (U.K), OXFAM, Operational Eyesight Universal (Canada).

Within India ASM is also financed by CAPART, Central Relief Committee, Science and Technology Department (GOI), National Environment Education Campaign. At the state level, ASM works in close collaboration with Tribal Development Agency, District Rural Development Agency, Health Department.

Copies of Audit Statment of Accounts of the last three years is provided.

(annexure VI: Balance Sheet for the Years 88,89,90)

III ASM'S INVOLVEMENT WITH NAP

- 3.1 ASM came into contact with NAP in March 1990. During our discussions with the NAP Office at our office in Vijayawada, possibilities for our collaboration with NAP were explored, for the districts of Nalgonda. Krishna and Prakasam. ASM took up a consultancy work preparatory to the formulation of AP III projects. As a predocumentation work, ASM conducted comprehensive socio-economic surveys in the proposed project areas of Kanigiri (Prakasam) and Nalgonda. This work has been successfully completed and the final reports were submitted in July and September, 1990.
- 3.2 In view of the above experience, ASM has accepted to undertake Community Participation and Health Education related ativities under AP III Nalgonda. The insights gained into the problems and possibilities in the project area of Nalgonda (during two months intense survey work) has provided ASM with additional capability in formulating this proposal.

IV PROJECT CONCEPTS AND STRATEGIES

4.1 ASM is in agreement with the concept of participation as expressed in the document "Participatory Approach", prepared by NAP Office:

"Participatory process is understood in the fullest sense as a process of facilitating and supporting peoples' own efforts to self improvement and selfreliance. External interventions are only promotive. People take primary responsibility in identifying their own development needs and organising themselves to respond to these needs."

- 4.2 However in the context of a bilateral project, with largely predetermined packages and time schedules, community participation has to be realistically limited to promoting peoples involvement in the implementation and maintenance of water/sanitation programme. These can be entry points to bring to light deeper developmental issues of the community and enable the community to respond to these perceived problems.
- 4.3 Community Participation will now mean seeking a methodology for creating enthusiasm in the target population in planning, implementing and maintaining the various components of the project.
- 4.4 In keeping with ASM's established style of functioning, the methodology adopted would provide for:
 - Familiarising the people with the project
 - Helping them to articulate their needs/opinions/ attitudes to the project
 - Educating the people about their rights and duties towards the project
 - Organising the people for responsible participation in maintenance of assets created.
- 4.5 To achieve this our approach will be :
 - To adopt a low profile intervention, avoiding too many hierarchies and promoting team work
 - To promote maximum community participation
 - To ensure that practices evolved during the project are sustainable

- To promote close interaction and collaboration with all the participating agencies
- To identify and develop local leadership especially among women for responsbile participation in the project
- To contribute to improved KAP in the areas of health, water and sanitation

V PROGRAMME COMPONENTS

The main components of ASM's activities will be:

- Mass Awareness campaigns to familiarise people with the project.

ŀ

- Formation of peoples organisations as forums for participation in the project.
- Training/Education of leaders of peoples organisations.
- Health/Hygiene Education to specific groups especially women and school going children
- Promotion of comprehensive sanitation programmes among target population/villages
- Organisation of people to participate in construction activities such as siting of taps, location of OHSR
- Assisting PRED in evolving financially and institutionally viable arrangements for Gram Panchayat sharing of reposnibility in operation and maintenance of the water supply system at the village level

VI OPERATIONAL PLAN

- 6.1 The project area consists of 226 revenue villages in 16 mandals of the Nalgonda District.
- 6.2 We propose to establish a project office at Nalgonda, the district headquarters. The project area will be divided

into 5 zones, each with a sub-office entrusted with the responsbility for 40 to 50 villages. At ASM level, an exclusive Desk will be set up for monitoring, coordination and facilitation.

- 6.3 At the village level, a village animator (a local person, preferably a woman) will be selected and appointed for acting as an interface between the project and the community.
- 6.4 Within each zone, an area approach will be adopted, phasing the coverage of villages to correspond with the work of PRED. The coverage will be gradually expanded to the entire zone.
- 6.5 The activities are planned at four levels:
 - a. At village level
 - b. At zones level
 - c. At project level
 - d. At ASM level

(annexure VII: Organogram of ASM-NAP)

- 6.6 At village level:
 - General awareness and mass contact
 - Formation/strengthening of peoples groups such as mahila mandals, youth groups, anganwadis
 - Linkages with health workers, anganwadi workers, school teachers
 - Identification and training of local informal leaders, and building up the good will of formal leaders such as sarpanch
 - Health awareness programmes at the village level, in cooperation with the PHC/anganwadi
 - Formation of school health clubs and organisation of health/sanitation campaigns

- Involving local artists in conveying water, sanitation, health messages
- Organisation of VILLAGE ACTION COMMITTEES as responsible for village water/sanitation and developmental work
- Exposing and educating the village leaders to the water supply technology
- identification and training of village masons for taking up sanitation construction work
- Identification of village caretaker for the water supply system in consultation with GP and PRED (the village animator could be the appropriate candidate)

The Zonal Coordinator will be responsible for the planning and implementation of these activities. The village animator will assist in this by mobilizing people and facilitating the cooperation of the village.

6.7 At Zones Level

- Identification of Village Animators in consultation with the village community and ASM
- Organisation and conduct of training programmes for:

Mahila mandals
Youth groups
Anganwadis
Gram Panchayat Leaders (GP)
Youth leaders
School Health Club leaders
Anganwadi and Health workers
VAC Leaders
Village Animators
Exposure to water supply system
Training of Village cultural teams

- Organisation of inter school cultural programmes
- Organisation of mass contact programmes in villages
- Coordination with other agencies participating in the project

The Zonal Coordinators will be responsible for these activities with the support of project office. They will report to the principal coordinator.

6.8 At Project Level:

- Preparation of Training Modules for the zonal level training and their demonstration.
- Preparation/collection of AV materials
- Preparation and planning folk media programmes
- Liaison between ASM and PRED/Participating agencies
- Organisation of training programmes for personnel
- Liaison with and reporting to ASM
- Providing administrative support to zonal offices

The principal coordinator will be responsible for these activities with the administrative and resource support of his project team and with backstopping from ASM.

6.9 At ASM Level:

- Identification and orientation of AV and Media consultancies
- Identification of suitable training programmes for project coordinators
- Policy and administration support
- Selection and appointment of senior project personnel
- Liaison and reporting to NAP office
- Liaison with participating agencies at state level
- Regular field based reviews

The desk officer at ASM will be responsible for these activities with active support of the Secretary of ASM.

VII INSTITUTIONAL ARRANGEMENTS

7.1 At ASM Level:

The Secretary of ASM will be the project holder and as such will be responsible both for reporting and liaison between the project and NAP office/other participating agencies. He will be the chief functionery with overall programme, finance and accounting responsibilities.

He will also provide necessary backstopping to the project by keeping himself well informed of the activities in the field.

Training and consultancies support will be mobilised by him whenever necessary. In consultation with the project personnel he will formulate overall operational plans and monitor progress and identify constraints and bottlenecks preventing the pace of progress and initiate steps to overcome these difficulties.

A desk with necessary full time staff is to be setup at ASM office, Vijayawada, for assisting the secretary in his monitoring, coordination, reporting and accounting responsibilities.

7.2 At Project Level:

The project office at Nalgonda will be headed by the principal coordinator who shall be the chief-executive exclusively responsible for the planning and implementation of the project. He shall report directly to the Secretary, and on his behalf laison with all participating agencies and NAP Office. He will also be responsible to ASM for project personnel management, administration and programmes.

He will be supported by a team consisting of:

coordinator (media)
coordinator (developement training)
administrative staff (accountant & office asst)

A functional office will be set up at Nalgorda. In keeping with ASM's traditions, the project environment should be conducive for community living and participatory learning and working.

As such ASM proposes the setting up of a centre which will function as a project office as well as training nodal point for personnel and community leaders. The centre will have adequate facilities for dormitory, group discussions and meetings as also demonstration models/exhibitions on water, sanitation and health. Since ASM proposes to continue with its developmental activities even after the withdrawal of NAP, the need for a such a centre is reinforced.

7.3 At Zones Level:

In each of the five zones, there will be a zonal coordinator entrusted with the responsibility for implementing a package of preplanned ativities in a cluster of 40/50 villages. They will report to the principal coordinator.

At each zone a functional zonal office is to be set up.

This will also serve as a residence of the zonal coordinator. However all administrative support will "be provided by the project office. The facilities of the project level office will be availed also for zonal training programmes.

7.4 At the Village Level:

There will be on an average a village animator for every 2 villages. He/she will be a resident from the village and hence will be available at the village at any time. The main tasks of the animator is to assist the zonal coordinator in implementing the programmes at the village level, to function as carrier of the project messages to the village and to provide feed back to the project regarding the attitudes and responses from the village. The village animator will be responsible for making door to door contacts to explain the project to individuals and families. He/she shall mobilize people for meetings and training programmes. The animator will also maintain good contacts with local leaders, school teachers, Anganwadi

workers and health workers, youth groups and mahila mandals.

The animator will report to the zonal coordinator.

VIII PERSONNEL MOBILIZATION

- 8.1 ASM will be responsible for selection and appointment of all project personnel. Care will be taken to recruit/nominate to the project exclusive staff with adequate background in water/sanitation and integrated rural development activities.
- 8.2 The following personnel are to be recruited/nominated:
 - a. Desk Officer at ASM level
 - b. Principal Coordinator
 - c. Coordinator (Media) and Coordinator (Training)
 - d. Zonal Coordinators (5)
 - e. Village animators (160)
 - f. Accountant
 - g. Typist/steno (ASM/NLG) (2)
 - h. Attenders (ASM/NLG/ZNS) (7)
 - i. Watchmen (NLG/ZNS) (6)

8.3 Selection Procedures:

While ASM will lend the services of some of its personnel to this project, we will be compelled to recruit new personnel considering the size of the project. These personnel will be carefully recruited as per established ASM rules, giving preference to commitment, competance and experience.

Before final selection, short-listed candidates will go through 15 days of training in an ASM environment. This will give a chance to the candidate and to ASM to know and assess each other.

Personnel who require specialized skills such as management, use of media, development training, etc. will be given opportunity to undergo such trainings before they are placed in the field. All personnel will undergo 15 days refresher training every year and specialized trainings whenever the need arises.

The village animators will be selected from the village where he/she is expected to work. The opinion of the villagers will be taken into consideration and preference will be given to women/couples. Their selection and appointment will be done in a phased manner over a period of one year. The zonal coordinator will identify the candidates, who will be short-listed by the principal coordinator. Such candidates will be given field exposure and training before being finally appointed.

In all cases the appointing authority shall be the Secretary of ASM.

IX HUMAN RESOURCE DEVELOPMENT

9.1 Training is aimed at three levels:

Project personnel Community leaders/Village level functionaries Peoples organisations at the village level

- 9.2 While training at the second and third level are to be imparted mainly by the project personnel (with consultancy support for module development etc.), training programmes for project personnel will be planned and organised mainly through specialised agencies identified by ASM.
 - 9.3 As far as community oriented training is concerned, first training programmes will be organised for identified peoples organisations within each village. At a second stage, leaders of these organisations will be brought together and imparted more intense training at zone/project level.
 - 9.4 The trainings will be made attractive through the use of cultural, folk and audio-visual media. Each training programme will also lay special emphasis on group participation and shared learning.
 - 9.5 Understanding the technology and construction aspects of the supply system is considered essential for promoting participation. Hence, visits to the water head works by key persons in the village is envisaged. Orientation of community leaders and village masons to the principles and technology of low cost sanitation is also essential. For these purposes also scale models and demonstration units will be set up at the proposed training centre.

X COMMUNITY PARTICIPATION STRATEGIES

10.1 Community participation starts with mass awareness programmes and matures into the formation of the VILLAGE

ACTION COMMITTEES. In between these points of departure and arrival, several intermediate processes are necessary:

- a. Groups formation
- b. Training of leaders
- c. Cultural and AV campaigns
- d. Improved health KAP through anganwadis
- e. Exposure to water supply technology
- f. Formation and training of VAC
- g. Cooperation with PRED in construction of water supply system.
- h. Training village water-system care-taker
- i. Sanitation campaigns
- 10.2 Even before the VAC is formed, participation from the village community will be elicited. Explanation of the project to peoples groups will generate interest in the programme and this can be concretised by involving them in the location of standposts, deciding on the hours of water supply, participation of local labour in construction work, decisions regarding selection of care-taker, selection of beneficiaries for sanitary units, type of sanitation arrangements required and selection of local masons.

XI HEALTH EDUCATION STRATEGIES

Besides general awareness programmes, specific health education programmes will be conducted involving mahila mandals, school teachers and children, anganwadis. These programmes will be implemented with the cooperation of the health department, the I.C.D.S. and the District Education Officer. Efforts will be made to make the programmes attractive to the village folk by dressing the messages in cultural forms or conveying it through AV media.

1

- 11.2 Special attention will be given to encourage school going children to learn songs, dances, dramas, stories, etc,.
 with health messages. These will be displayed on a public stage to spread the message. The students will also be trained, to form school health clubs with the responsibility to maintain health standards in the school environment, including water/sanitation.
- 11.3 Health Education for Mahila Mandals will include programmes on child care, child nutrition, immunization, personal hygiene, prevention of water related diseases, promotion of personal and domestic sanitation, demonstration of soak pits, smokeless chulas, kitchen gardens. ASM will train anganwadi/ village health workers and will involve them in organising these programmes.

XII USE OF MEDIA

- 12.1 Both the cultural and audiovisual media will be widely used in promoting awareness, community participation, health education, sanitation, village development etc.
- 12.2 For AV media, existing programmes and materials will be used, but new programmes and materials (posters, flip charts, slides, demonstration modles) will also have to be prepared. Other NGOs participating in NAP will be invited/consulted in the preparation/use of new AV materials.

12.3 In developing the cultural media, local art forms like burra kadha, hari kadha, puppetry, street theater, songs and dances etc.. will be performed involving local artists.

The coordinator for media will undergo special trainings on effective communication through media. The existing cultural talent in villages will be identified and trained with the help of experts to form village cultural teams.

These teams can perform also in other villages. The youth of the villages will be particularly involved in such programmes. Expert folk artists on short term consultancy basis will be invited to study field situations and produce attractive programmes and perform them in the villages. The desk office at ASM will coordinate such consultancies closely involving the media coordinator.

XIII VILLAGE LEVEL WATER MANAGEMENT

- 13.1 Every village has its own traditional water supply and sanitation systems. The present programme is aimed at enhancing these systems and evolving a method to ensure the use and maintanance of these services. The more advanced the system, the more complex become the operation and maintanance, and the community has to be prepared to handle these tasks.
- 13.2 This calls for institutional arrangments within the community to carry out the operation and maintanance

programme. The current practice with regard O/M of water supply systems is as follows:

- a. Comprehensive schemes:
 These are maintained fully by PRED. The G.P.
 does not share any responsibility either on the
 financial or technical aspects (though at the
 GOAP level at source deductions from GP grants
 are made towards contributing to O/M but this
 being too far from the people the feeling of
 contributing is hardly felt).
- b. Individual schemes: Once these schemes are executed they are handed over to the GP for O/M. However hardly ever it is examined whether the GP has know how or the resources to take up O/M. Generally such schemes fall into disuse after some time.
- 13.3 Both these practices do not seem viable. During the formulation of the project, a consensus has been arrived at that well before the new schemes are commissioned a suitable O/M policy will be evolved sharing responsibility between PRED and the GP.
- 13.4 A possible line of approach could be for the PRED to take care of the system up to the village distribution and for the GP to take the responsibility for the distribution system. The resource constraint of the GP could be overcome by permitting predetermined number of private/yard/group connections (taking adequate care not deprive the weaker sections). In addition to generating revenue this could ensure greater interest and particiation of the village community in O/M.
- 13.5 Institutional arrangements for sharing O/M responsibilities have to be evolved through a dialogue between the PRED and

who purp cxta dinerin

- the GP. The community participation movement developed during the project period could find a place within the GP as a VAC charged with the responsibility for water and sanitation. This VAC could contain the elements of both formal and informal leadership and strong presence of women.
- 13.6 The VAC could on behalf of GP take up the responsibility for village level O/M. It could appoint a village caretaker (possibily the animator who could be a woman). The caretaker could be given technical training by PRED and function under the administrative control of GP/VAC.
- 13.7 During the course of the project, ASM will facilitate further elaboration and concretisation of these concepts to come up with a viable village level O/M.

XIV PROMOTION OF VILLAGE SANITATION

- 14.1 A healthy individual lives in a healthy community and a healthy environment. Changes in the environment demanded by sanitation engineering will be sustainable only if the attitudes of the individuals and of the community change. Hence sanitation is more a way of life than the mere construction of some structures or the provision of certain amenities.
- 14.2 The saanitation programme as envisaged under the project is a comprehensive package of hard and soft ware. ASM's responsibility would be for the front line organisation,

motivation and education programmes at the village, school and family levels. The administrative and technical services are to be provided by PRED.

14.3 The project components would include:

a. Hardware (PRED):

Construction of household latrines

Construction of institutional latrines in schools, health centres and anganwadis with adequate provisions for assured water supply and drainage.

Sanitation around public stand posts.

improved drainage system in the village.

b. Software (ASM):

Awareness on sanitation and hygiene within the community, schools and anganwadis.

Demonstration of sanitation technologies.

Organisation of beneficiaries and mobilisation of beneficiary contributions

Identification of village masons and facilitation of their training

Educating the people to the proper use and maintanance of sanitary facilities.

Promoting domestic sanitation through provision of bathing cubicles, soak pits, kitchen gardens, smokeless chulas etc.

Promoting community sanitation though motivation of VAC/GP and training the village caretaker and ensuring community involvement by organising shramdans, work camps, cultural shows, jatras, etc.

14.4 However any sanitation programme will be successful only if proper institutional arrangements exists to dovetail the technical and financial inputs with the articulation of awareness and needs from the community. ASM will take

special care to ensure this coordination between the community and PRED.

XV FINANCIAL IMPLICATIONS

- 15.1 ASM has prepared a budget proposal for a five year intervention into the identified 226 revenue villages and its hamlets. In preparing this budget the following general norms have been followed:
 - a. The salary structures are in keeping with the existing norms and practices of ASM.
 - b. An annual increase of 5% is provided on recurring expenditures.
 - c. Inorder to keep personnel strength at a low profile, it is proposed to avail adhoc consultancy services for developing new AV materials and for media/training services;
 - d. Expenditures are envisaged at four levels:

Village level Zones level Project level ASM level

15.2 The budget proposal is for Rs. 96.569 lakhs (Rupees Ninety six lakhs fifty six thousand nine hundred only) spread over a period of five years. Detailed budget proposal is annexed.

(annexure VIII: Budget Proposal with an Explanatory Note)

15.3 An abstract of the budget is provided be	below	ded	provided	s	is	budget	the	οf	abstract	Αn	15.3	1

- 15.4 It is requested that 100% non-recurring expenditure (11.365 lakhs) and 50% of the recurring expenditure for year I (5.690 lakhs) be advanced to ASM. The total advance requested is Rs.17.00 lakhs. Subsequently, quarterly recurring expenditures may be reimbursed. The advance may be adjusted against claims during year 5.
- 15.5 ASM will maintain separate books of accounts and furnish quarterly returns to Royal Netherlands Embassy through NAP Office, within 15 days after the end of each quarter.

 Annual audit statements will also be furnished.
- 15.6 Accounting and reporting procedures are discussed below.

XVI ADMINISTRATION/ACCOUNTING

16.1 At ASM Level:

The Secretary, ASM is the project holder and shall enter into all agreements with the Royal Netherlands Embassy. He shall be responsible for all official correspondence. His responsibilies will cover especially the areas of policies, strategies, personnel recruitment, finance, accounting and reporting.

He will represent ASM at all review meetings at the state level. However, the principal coordinator will represent ASM at the district level and as far as day to day management of the project is concerned.

The project funds shall be paid into ASM's account as follows:

ACCOUNT NUMBER: 6474

BANK: Central Bank of India Benz Circle Branch Vijayawada 520 006 - A.P.

The necessary documents indicating mode of operation of account is annexed.

(annexure IX: Mode of Operation of Bank Account)

The Desk officer at ASM will scrutinize the monthly financial statements received from the project office and shall maintain all necessary books of accounts exclusively for the project. He will consolidate the quarterly

financial statements and forward them to NAP Office. Annual audit reports will also be furnished to NAP Office. In consultation with NAP Office, the desk officer will finalise proformae for reporting progress and statement of accounts.

16.2 At Project Level:

Though the project funds are received by ASM, a separate project account, jointly operated by the Secretary and the principal coordinator will be opened with a bank in Nalgonda. Based on a letter of indent from the principal coordinator, a lumpsum will be transferred to this account every month.

The Accountant at the project office in Nalgonda will be responsible for maintaining accounts of the project under the authorisation and control of the principal coordinator. He will maintain necessary vouchers, cash books and present monthly statement of expenditures to the principal coordinator, who shall verify the same and forward them to the desk office at ASM. The expenditures will generally correspond with budget provisions and specifically with the monthly budgets prepared by principal coordinator and approved by the ASM. Any major deviations from budget privisions will be with the approval of ASM and NAP Office.

16.3 At Zones Level:

The zonal coordinators will prepare their monthly budgets, which shall be discussed and finalised during monthly review

with the principal coordinator. Based on this approved budget, the accountant shall advance fortnightly imprest to the zonal coordinators after receiving and verifying statements of accounts and vouchers for the previous fortnight. However major expenditures shall be incurred only at the project level.

XVII REVIEW/COORDINATION/MONITORING

17.1 At the Zones Level:

The basic unit of monitoring will be the zone. The zonal coordinator will in cooperation with his village animators organise all programmes/trainings and will review and monitor the impact of the work. The operational plan envisages that the zonal coordinator will conduct 7 to 8 village level programmes/zonal training programmes every month.

The zonal coordinator will meet with his village animators once every month to chalk out the coming month's programme and to review the previous month's work. During this review, each animator will prepare his/her monthly schedule of village level programmes. It shall be the animators responsibility to do the spade work for these programmes.

17.2 At Project Level:

The principal coordinator will, in consultation with the

media and training coordinators and the zonal coordinators, prepare monthly action plans for the whole project and for each zone in particular. He will monitor the progress of implementation of the entire project. This will be formally done during the monthly review and planning meetings he has with his coordinators. These meetings are the normal mechanism for planning, review and monitoring. Monthly reports and monthly action plans are the indicators of progress. The zonal coordinators and media/training coordinators shall prepare their monthly progress/planning reports which will be consolidated by the principal coordinator and sent to ASM.

17.3 At ASM Level:

The Secretary/desk officer will receive the monthly reports and review it with the principal coordinator. During this review gaps in implementation/recurce support will be identified and ASM will make arrangements for necessary support inputs. In addition, the Secretary/desk officer shall make regular field visits to the project area and participate in evaluation/review/meetings at project/zone levels.

- 17.4 ASM will organise quarterly reviews involving all the coordinators and finalise quarterly progress reports/action plans for sending to NAP Office.
- 17.5 Annual review/planning meetings will be organised at the end of each year involving also the representatives of NAP Office.

- 17.6 Provision is also made for a mid-course participatory evaluation of the directions/impact of ASM's interventions.

 Such evaluation could lead to project reorientations and consequent budget reappropriations.
- 17.7 An activity flow diagram is annexed to this report. This flow chart is only indicative of the broad line of approach and phased intervention strategy. Field situations may warrant further modifications in this time schedule.

(annexure X: Activity Flow Chart)

XVIII CONCLUSION

- 18.1 Community participation is all about the attitudes opinions, fears, needs, and expectations of a community, which are in turn rooted in the culture and reality of the life of people. It is in this environment that a dialogue is to be intiated between the community and the project.
- 18.2 Changes in the perceptions and responses of the people can not be engineered and are not easily quantifiable. As such ASM's efforts to involve the people in a responsible participation in the project can be seen only as an obgoing process, the measures of success being indicators such as peoples participation in meetings, construction and maintanance activities, interation with PRED and other participating agencies.
- 18.3 However only a sense of ownership and belonging will ensure

that the assets created are utilised and maintained and go to improve the health standards and quality of life of the people. This demands a two way process. Even as the community is being slowly educated and motivated to participate, the project should respond with a promotive environment in which there is openness to the ground level realities and flexibility to respond to these realities. Unless the project provides such an environment, participation may only further viciate the situation.

- 18.4 It shall be the conscious endeavour of ASM to dialogue not only with the people, but also with the implementing agencies so that the project appreciates and response to the dynamics from the community. Formal channels of dialogue such as the distrcit project committee, the apex steering committee, as well as the informal channels of communication and collaboration will be fully utilised to ensure that participatory processes are initiated not only in the community but above all within the project ethos.
- 18.5 It is encouraging to note that right from the formulation stage of AP III, efforts are being made to ensure interagency coordination. This augurs well for community participation.

CERTIFICATE OF REGISTRATION OF SOCIETIES

Act XXI of 1860

SOCIETY No. 45 of 1978

I hereby certify that "ARTHIK SAMATA MANDAL"
Atheist Centre, Patamata, Vijayawada--6, has this
day been Registered Under The Societies Registration Act XXI of 1860.

Given under my hand at Machilipatnam this 2nd day on March One Thousand Nine Hundred and Seventy Eight / 11th Phalgun 1899 S.E.

(sd) K.VENKATESWARA RAO, District Registrar, Krishna Dist., 2--3--1978.

((TRUE COPY))

ARTHIK SAMATA MANDAL

PREAMBLE

Since we find that whatever inputs we are able to put for increasing the production in an economy where disparity prevails, these are made use of by the rich not only leaving the lower ones without their due share but also giving more power to the strong to exploit the weak. Thus the disparity is increasing between the rich and the poor in the villages, the rural and the urban in the country and between the developing and the developed nations in the world. This widening gulf is the most dangerous portent of peaceless-ness resulting in consequences which can well be imagined. Here we remember Gandhi's dictum.

"Recall the face of the poorest and the most helpless man whom you may have seen and ask yourself, if the step you contemplate is going to be of any use to him, will he be able to gain anything by it? Will it restore him to control over his own life and destiny? In other words, will it lead to Swaraj or self-rule for the hungry and also spiritually starved millions of our countrymen? Then doubts and yourself melting away".

This fact has been the basic premise on which Gandhi gave his call for "Unto this last" or "ANTYODAYA" and included economic equality as one of the pivotal programmes of his constructive work.

To give effect to this programme a body was formed in the year 1952 under the leadership of Gandhiji's close associates who interpreted and lived on Gandhian principles of economic equality and the life long crusaders for the dignity of the common man - J.C. Kumarappa and Gora.

Now it is the time to establish this institution "Arthik Samata Mandal" to help the poorest and to pursue the dream of Gandhi, Kumarappa and Gora.

ARTHIK SAMATA MANDAL

MEMORANDUM OF ASSOCIATION

1. NAME OF THE INSTITUTION:

The name of the Institution shall be "ARTHIK SAMATA MANDAL".

2. SITUATION OF REGISTERED OFFICE:

The Registered Office of the ARTHIK SAMATA MANDAL shall be situated at ATHEIST CENTRE, Patamata, VIJAYAWADA -- 6 Krishna District.

3. AIMS AND OBJECTIVES:

- I. To Promote and facilitate study and research in regard to Gandhian thought and allied subjects, with a view to influencing the thought and action of the people and helping them to maintain peaceful, harmonious and happy social relations without hatred or violance of any kind:
- II. To impart and promote scientific, secular, democratic and cosmopolitan outlook among the people and to make them better citizens by helping them to realise their responsibilities and to discharge their duties to Society through various social, economic, educational and cultural processes.
- III. To help and promote peaceful, non-violent and constructive activities for social change.
 - IV. To undertake Gandhian constructive programmes aimed at relieving the people in general and the people in rural areas in particular from their existing poverty, and to foster cultural and social development.

To undertake any or all of the activities mentioned below:

GANDHIAN CONSTRUCTIVE ACTIVITIES:

- a) Basic Education
- b) Adult Education
- c) Improvement of village arts and crafts
- d) Promotion of National Integration
- e) Improvement of Art, literature and science
- f) Promotion of economic equality through peaceful and non-violent means
- g) To propagate the Gandhian concept of Trusteeship.

- V. To provide guidance and consultation to the organistations and government agencies engaged in rural development in implimenting their programmes and the evaluation of their performances.
- VI. To help organisations working in rural areas to adopt and use the modern technology in their efforts for rural development;
- VII. To organise training programmes, seminars and workshops for the workers of the voluntary organisations engaged in rural development and to develop their skills and methods of work.
- VIII. To establish maintain and aid institutions that have undertaken the above programmes.
 - IX. To acquire movable, and immovable properties on behalf of the Mandal and to utilise, sell and mort-gage etc., or otherwise deal with the movable properties of the Mandal.
 - X. To establish libraries and reading rooms and to do such other acts as may be conducive to the attainment of the above objects and also to promote the establishment of libraries and reading rooms.
 - XI. To fulfill the above objects of the Mandal, the Mandal shall raise funds and contributions, and can spend sell, mortgage or collect movable and immovable properties wherever necessary, establish offices, open branches and to undertake projects.
- XII. To raise funds for the proper functioning of the Mandal from members either as donations, deposits, advances, loan subscriptions or otherwise and also to receive from public institutions, Government Agencies (Statutory Boards) such as other Boards funds by way of loan, grant and subsidy etc.
- XIII. To produce and disseminate necessary and useful literature for propagating the objects of the Mandal.

The names addresses, Occupations and Designations of the Members of the Board of Trustees (Managing Committee) to whom the Management of affairs of the Mandal are entrusted as required under section of the Societies Registration Act are:

6.	Sri	C. Niyantha	Trustee
7.	Sri	Y. Madhu	Trustee
8.	Sri	Jayasimhachary	Trustee
9.	Sri	M. Veeraiah	Secretary

These Trustees will hold Office for the first five years, thereafter, three trustees out of the first nine trustees as mentioned above, as may be determined by lot shall retire, by rotation every three years and their vacancies shall be filled in by the remaining trustees. Such retiring trustees will be eligible for renomination.

- c) the Board of Trustees shall
 - i) meet atleast once in three months. The quorum for conducting business in such meetings shall be five.
 - ii) elect the Chairman, Vice-Chairman, Secretary and Treasurer from out of its members who shall hold

Office for a period of five years initially and after completion of the said term there shall be election from out of the Trustees of Chairman, Vice-Chairman, Secretary and Treasurer, every three years by the Board of Trustees;

- (d) The Board of Trustees shall perform all transactions relating to the Mandal and its branches e.g. purchase, sale, mortgage, lease of its properties and to receive loans and stocks of goods;
- (e) all policy matters relating to the utilisation of funds and other financial matters of the Mandal shall be decided by the Board of Trustees;
- (f) the Board of Trustees shall have power to appoint such sub-committees as and when necessary to advice the Mandal on such matters as the Board of Trustees deem necessary. The Board of Trustees have the power to coopt any experts of their choice on such advises becomes necessary.
- 13. TERM OF OFFICE: The Board of Trustees mentioned in the Memorandum of Association shall constitute the first of the Mandal and its period of Office shall be FIVE years.
- 14. QUORUM: a) The quorum for the General Body shall be 1/2 of its members;
 - b) The quorum of the Board of Trustees shall be Five.
- 15. EXTRAORDINARY MEETING: Extraordinary Meeting can be called for by the Secretary on the requisition of the Chairman, such meeting shall also be called by the Secretary if he receives a requisition to that effect signed by atleast 1/3rd of the total members on rolls of the Mandal within one month from the date of receipt of the requisition.
- 16. ORGANISATIONAL SET UP: The rules and regulations necessary for the promotion and progress of the activities of the Mandal shall be prepared by the Trust Board. The trust Board shall be responsible for carrying on the programme of work outlined by the Mandal and shall make proper arrangements for the organisational set up required for the purpose. The Board of Trustees shall have authority over the properties and finances of the Institution.

- 17. Action Committee on behalf of the Mandal will have to be constituted to work actively for the quick and timely realisation of the special forms of assistance available to them from the State and Central Governments. The Action Committee would also assist the Mandal in securing the translation into action of the special safeguards and the previlages provided in the constitution of India.
- 18. The General Body shall have power to alter, amend or abridge the rules and regulations within the meaning of the constitution of the Mandal on the recommendation of Board of Trustees.
- 19. VALADITY OF MEMBERSHIP: If any member of the Trust Board absents himself/herself for three consecutive meetings he/she shall cease to be the member of the Trust Board and shall lose right to vote.

20. DUTIES OF OFFICE BEARERS:

- a) CHAIRMAN: The Chairman shall preside over all meetings of the Mandal, supervise all activities of the Mandal and give directions to the Secretary for the administration of the Mandal. In the absence of the Chairman the Vice-Chairman of the Mandal shall preside over the meetings. In his absence the Board of Trustees shall choose one amongst them present to preside over the meeting;
- b) VICE-CHAIRMAN: In the absence of the Chairman, the Vice-Chairman of the Mandal shall preside over the meetings;
- c) <u>SECRETARY</u>: The Secretary shall convene the meetings of the Board of Trustees as well as the meetings of the Executive Committee as provided for. He shall present the accounts and reports to the Board of Trustees, periodically, shall cause to maintain accounts and records, present the annual reports and balance sheets etc., to the Board of Trustees and to other bodies and do every thing for the progress and furtherance of the objects of the Mandal. He shall function as the Chief Executive of the Mandal.
- d) TREASURER: All documents on behalf of the mandal shall be executed by the Chairman, Treasurer and Secretary of the Mandal in accordance with the Resolution passed by the Board of Trustees in that behalf and that the Chairman, Treasurer and Secretary shall use or be used in the name of the Mandal:

- e) TRUSTEES: All the trustees shall assist to the chairman, Secretary, and Treasurer of the Mandal in day to day work.
- 21. REMOVAL OF MEMBERSHIP: The Board of Trustees of the Mandal may refuse membership to any body without assigning any reason what-so-ever. A member of the General Body can be expelled by the Board of Trustees in the event of member acting in a manner prejudicial to the objects of the rules and regulations of the Mandal.
- 22. ADMISSION OF THE NEW MEMBERS: All applications received from institution seeking admission into the Mandal fulfilling the conditions prescribed by the Mandal shall be placed before the Board of Trustees which shall decide the grant of membership.
- 23. REPLACEMENT OF FILLING IN VACANCIES: In the case of vacancies arising by resignation, death etc., in the Board of Trustees, the Board of Trustees shall fill up the vacancies by nomination.
- 24. APPROVAL OF RESOLUTIONS BY CIRCULATIONS: If for any reason the Board of Trustees cannot be convened to meet, resolutions of the Mandal can be circulated among the members of the Board of Trustees and their approval thereof obtained and incorporated in the minutes of its next meeting.
 - If however, a majority of members do not approve of the resolution, the same should be placed before the next meeting of the Board of Trustees.
- 25. AMENDMENTS TO RULES AND REGULATIONS: The General Body shall have power to make amendments to and alterations in the constitution and rules of the Mandal at a meeting specially convened for the purpose by a 2/3rd majority vote of the members present and voting provided that such amendments and alterations to the constitution and rules are not inconsistant and incompatible with the aims and objects of the Mandal or the spirit underlying the same. Such resolution shall become operative only when it is once again affirmed at another become operative only when it is once again affirmed at another subsequent meeting of the General Body convened by a Majority of 2/3 for the purpose after an interval of one month after the passing of the resolution in the first meeting.
- 26. The General Body shall have power to approve rules from time to time for the proper conduct of the affairs of the Mandal.

- 27. OFFICIAL YEAR: The Official Year of the Mandal shall be from APRIL to MARCH of the Year.
- 28. ACCOUNTS: The annual accounts of the Mandal for each financial year shall be prepared in accordance With the rules governing the same and got audited by auditors appointed for the purpose and place before the General Body within the close of the Next Financial Year or earlier.
- 29. APPOINTMENT OF AUDITORS: The Board of Trustees shall appoint auditors annually for the audit of accounts.
- 30. <u>DISSOLUTION:</u> The Mandal shall be dissolved by a decision of 3/5th of the total members at an extraordinary meeting of the General Body specially convened for the purpose and the funds of the Mandal shall be paid or transferred after meeting all the liabilities to some other with similar aims and objects.
- 31. CERTIFIED THAT THIS IS A CORRECT COPY OF RULES AND REGULATION OF 'ARTHIK SAMATA MANDAL'.

AMENDMENTS:

- 25. (a) No amendment shall take place either in the Memorandum of Association or in the Rules and Regulations without the prior approval of the Commissioner of Incometax, Andhra Pradesh, Hyderabad.
- 30. (a) In case of winding up of the institution, all the income and assets will be transferred to an institution which is having similar objects which has been registered to the Commissioner of Incometax under Section 12A(a) of the Incometax Act, 1961.

AUDITOR'S REPORT

We have audited the accounts of ARTHIK SAMATA MANDAL, VIJAYAWADA-6 for the period from 1.1.1988 to 31.3.1989 and report as under:

The Institution is receiving funds from various funding agencies with a direction how to spend the money. The balances leftout as on 31.3.1989 in each funding agency account are shown separately in the Balance Sheet. A receipts and payments account is prepared for each funding agency and are annexed to this report.

Separate Receipts and Payments accounts, Income and Expenditure Account are parepared for Vocational Training account and Arogya Sudha account and are annexed to this report.

In view of the amendments made to Incometax Act, 1961 the Institution has changed its accounting year from Calendar year to Financial year. Hence the accounts are drawn up for the current year for a period of 15 months ie., from 1.1.1988 to 31.3.1989.

We further report that:

- (a) the annexed Income and Expenditure account of ARTHIK SAMATA MANDAL Fund Account shows a fair view of the surplus earned by the Institution for the period ending 31.3.1989 and
- (b) that the annexed Balance Sheet as on 31.3.1989 is a consolidated statement taking into account all the activities of the institution and it exhibits a fair view of the state of affairs of the Institution as on the said date.

AUDIT REPORT

I have audited the accounts of Arthik Samata Mandal, Vijayawada for the year ending 31-12-1987 and report as under.

The Institution is receiving funds from various funding agencies with a direction how to spend the money. The balances left out as on 31.12.1987 in each Funding Agency account are shown separately in the Statement of Affairs. A Receipts and Payment Account, Income and Expenditure Account and Statement of Affairs as on 31.12.1987 for each funding agency are prepared separately and are annexed to this report.

The Institution is also maintaining a Dairy Farm, Poultry Farm, LAMP Unit, Employment Generation Unit and a Hospital "Arogya Sudha", with a view to achieve the objects of the society. The accounts of the above units are audited first time for the year ended 31.12.1987 and hence the opening cash and Bank Balances are taken as the opening fund of each unit. Separate Receipts and Payments Accounts, Income and Expenditure Account, and Statement of Affairs are drawn for each unit and are annexed to this report.

Thus the annexed Statement of Affairs as on 31.12.1987 is a consolidated statement taking into account the above activities of the Institution.

The annexed Income and Expenditure account shows a fair view of the surplus earned by the Institution for the year ending \$1.12.1987 and the annexed statement of affairs of Arthik Samata Mandal shows a fair view of the state of affairs of the Institution as on said date.

Place: VIJAYAWADA

Date: 02.02.1988.

EXPLANATORY NOTE TO THE BUDGET

Salaries: In the ASM tradition every staff member receives an extra month salary in the month of December. This is because the organisation is not able to provide for PF, Medical Bills, Leave encashments etc. Hence in this budget also provision is made for payment of salary for 13 months.

- 1.A.9. Incidentals are meant to cover food expenses and hospitality expenses of personnel who are constantly travelling or may meet village officials/Government officials.
- 2.A.3. Provision is made for daily batta for divers on field trips at the rate of Rs.15 per day for 20 days a month.
- 5.2.a. Office expenses at ASM, Nalgonda and Zonal Offices is covered with an average budget of Rs.2,500 per month. This is for office overheads such as Postage, Communication, Stationery, Printing, Telephone, Periodicals and Hospitality.
- 5.2.b. Total rent of Rs.6,000 per month for 7 offices at ASM, Nalgorda and Zones is provided in this section. It may be split as follows:

 Office Rent at ASM
 Office Rent at Nalgorda
 Rs.1,500
 Office Rent 5 zones
 Rs.3,500
 Total per month
 Rs.6,000
- 6.1. Provision is made in the budget for consultancy services. Very often experts on Health Education, Sanitation, Community Organisation etc., will have to be invited to give talks on the subjects during training programmes/meetings.

- 8.11. The office at Nalgonda will also include at training centre with facilities for accommodation, demonstration-cum-exhibition on Health, Sanitation, Models and Water Supply Systems. For this intrastructure this provision is made in the budget. This will also ensure continuity of ASM presence in the area even after the NAP projects is phased out.
- 8.12 & 13 The whole programme lays a great emphasis on use for the media both cultural and audio-visual. This means that programmes will have to be prepared in the audio-visual and cultural medias with the help of experts in these fields. Hence budgetary provisions are made to meet these expenses.
- 9.4 Coordination at ASM involves preparationof monthly Financial Statements, Quarterly Financial Statements, Reports and Annual Audits, Documentation and an Annual Convention of all NAP/ASM Staff to instill in them the Gandhian spirit as practiced in the ASM work culture.

The total salaries (ASM, Nalgonda, Zone and village levels) amount to Rs.41.648 lakhs. This is a little less than half the total budget (96.569 lakhs). This is due to the fact that nearly half of the total salary (20.12 lakhs) is paid to the village animators who belong to the beneficiaries. Hence this is a direct investment for community participation.
