**November 1990**

**Mr. and Mrs. CLEAN and HEALTHY family.**

- Mr. and Mrs. **DIRTY** and **UNHEALTHY** family

Mrs. **HEALTHY** covers food to keep away flies.  
They also wash their hands before eating.

Mrs. **HEALTHY** buries faeces in a hole away from the home.

**Mrs. HEALTHY** keeps her compound clean

The **HEALTHY** family keeps their water covered to prevent the breeding of mosquitoes

Miss **HEALTHY** buries empty containers in a hole.  
This prevents the empty containers from collecting water  
to breed mosquitoes.

The well in the **HEALTHY** family's compound is always covered and the site kept dry to prevent the breeding of mosquitoes

The **HEALTHY** family has a gutter and a soakaway hole behind their bathhouse. This prevents water from standing around the bathhouse to breed mosquitoes.

The **HEALTHY** family keeps their river side free from weeds and rubbish. Mosquitoes cannot breed there.

Mrs. DIRTY's son has DIARRHOEA  
FLIES cause DIARRHOEA  
Let us prevent it

Mrs DIRTY has MALARIA  
MOSQUITOES cause MALARIA  
Let us prevent it.
