Cover Design by Sazzad Mahmood

Printed by Progressive Printers Pvt. Ltd. Dhaka, Bangladesh.

## **TABLE OF CONTENTS**

### **Preface**

### **PART 1: SOCIAL ASPECTS OF WATER SUPPLY & ENVIRONMENTAL SANITATION**

#### **Chapter 1 Introduction**

- 1.1 Background
- 1.2 Sustainability
- 1.3 Sustainable performance of water supply and sanitation systems

#### **Chapter 2 The User Community**

- 2.1 The Community
- 2.2 Community involvement
- 2.3 Community management
- 2.4 The management perspective
- 2.5 Different levels of management involvement

#### **Chapter 3 Institutional Aspects**

- 3.1 Introduction
- 3.2 The need for institutional changes
- 3.3 The actors 3.4 Principles and policies
- 3.5 Future roles of the actors
- 3.6 Important challenges

#### **Chapter 4 Gender Awareness**

- 4.1 Gender approach
- 4.2 Applying gender approach
- 4.3 Applying gender approach in the project cycle
- 4.4 Participatory tools

#### **Chapter 5 Health, Hygiene and Use of Facilities**

- 5.1 Introduction
- 5.2 Transmission routes of water-related diseases
- 5.3 Preventive measures
- 5.4 Cultural aspects
- 5.5 Socio-economic aspects
- 5.6 Hygiene education

#### **Chapter 6 Financial Aspects**

- 6.1 Introduction
- 6.2 Costs of water supply and sanitation systems
- 6.3 Cost Sharing
- 6.4 Financing of water supply and sanitation systems
- 6.5 Willingness to Pay

## **Chapter 7. Implementing Interventions**

- 7.1 Introduction
- 7.2 The project cycle
- 7.3 The project cycle within a community References/Bibliography

## **PART II : ENVIRONMENTAL SANITATION**

### **Chapter 8 Introduction to Environmental Sanitation**

- 8.1 Background
- 8.2 Sanitation and health
- 8.3 Objectives and definition of sanitation
- 8.4 Classification of Wastes
- 8.5 Sanitation Systems
- 8.6 Appropriateness of Sanitation Systems
- 8.7 Sanitation Practices in Bangladesh
- 8.8 Important Factors for Sanitation in Bangladesh

### **Chapter 9 On-Site Human Waste Management: Technological Options .**

- 9.1 Introduction
- 9.2 Simple pit latrines
- 9.3 Ventilated improved pit (VIP) latrines
- 9.4 Reed odourless earth closet (ROEC)
- 9.5 Compost latrines
- 9.6 Pour-flush sanitation technologies
- 9.7 Aqua Privies
- 9.8 Septic Tank System
- 9.9 Communal sanitation system
- 9.10 Worked Examples

### **Chapter 10 Wastewater Collection and Transportation**

- 10.1 Introduction
- 10.2 Conventional sewerage system
- 10.3 Small bore sewerage system
- 10.4 Simplified sewerage system
- 10.5 Non-sewered transportation of wastewater Chapter

### **Chapter 11 Programming for Sanitation Development**

- 11.1 Sanitation development programme
- 11.2 Planning for sanitation programme
- 11.3 Resource mobilization
- 11.4 Social organization for improvements
- 11.5 Environmental conditions
- 11.6 Preferences in sanitation design
- 11.7 Choice of sanitation technology
- 11.8 Incremental improvement of sanitation

## **Chapter 12 Treatment of Human Waste and Wastewater**

- 12.1 Introduction
- 12.2 Composition of human wastes
- 12.3 Objectives of human waste treatment
- 12.4 Principles of waste treatment
- 12.5 On-site waste treatment
- 12.6 Biogas recovery from waste treatment
- 12.7 Conventional wastewater treatment
- 12.8 Waste stabilization ponds
- 12.9 Duckweed-based wastewater treatment
- 12.10 Worked examples

## **Chapter 13 Stormwater and Sullage Drainage**

- 13.1 Introduction
- 13.2 Rainfall and runoff
- 13.3 Rainfall intensity
- 13.4 Time of Concentration
- 13.5 Factors affecting quantity of stormwater
- 13.6 Runoff estimation
- 13.7 Sullage disposal
- 13.8 Options for sullage and stormwater drainage
- 13.9 Worked examples

## **Chapter 14 Solid Waste Management**

- 14.1 Introduction
- 14.2 Quantities and composition of solid wastes
- 14.3 Storage and collection
- 14.4 Solid waste transportation
- 14.5 Processing of solid wastes and resource recovery
- 14.6 Composting
- 14.7 Ultimate disposal of solid waste
- 14.8 Hazardous wastes disposal References/Bibliography

## **PART III: WATER SUPPLY**

### **Chapter 15 Introduction to Water Supply**

- 15.1 Importance of water supply
- 15.2 History and development of water supply
- 15.3 Objectives of water supply
- 15.4 Elements of water supply
- 15.5 Planning and design considerations

### **Chapter 7. Implementing Interventions**

- 7.1 Introduction
- 7.2 The project cycle
- 7.3 The project cycle within a community References/Bibliography

**Chapter 16 Sources of Water**

- 16. Introduction
- 16.2 Hydrological cycle
- 16.3 Surface water
- 16.4 Groundwater
- 16.5 Groundwater in Bangladesh
- 16.6 Rainwater

**Chapter 17 Water Quantity and Quality**

- 17.1 Water quantity
- 17.2 Water quality Chapter
- 18 Water Treatment
- 18.1 Introduction
- 18.2 Plain sedimentation
- 18.3 Coagulation and flocculation
- 18.4 Filtration
- 18.5 Disinfection

**Chapter 19 Specific Groundwater Treatment Processes**

- 19.1 Introduction
- 19.2 Arsenic removal
- 19.3 Iron Removal
- 19.4 Removal of hardness

**Chapter 20 Water Transmission and Distribution**

- 20.1 Introduction
- 20.2 Classification of transmission and distribution systems
- 20.3 Distribution network
- 20.4 Design considerations
- 20.5 Service connections

**Chapter 21. Low-Cost Water Supply Technologies**

- 21.1 Technological options
  - 21.2 Dug well
  - 21.3 Tubewell technology
  - 21.4 Design, construction and maintenance of tubewells
  - 21.5 Alternative water supply technologies
- References/Bibliography Appendix
