Learning (and Practice) Alliances: Lessons from grassroots action- research

This session is to make others more familiar with the learning and practice alliances (LPAs) approach to action research; to share recent experiences, difficulties and successes of LPA implementation; and come up with ways forward for addressing recurrent challenges.

IRC will present the findings of a learning alliance study that assessed the efficacy and sustainability of the Learning Alliance Platform as a vehicle for sector learning at the national, regional and district levels, and CARE will share LPA implementation experiences and evaluation results from the Global Water Initiative – East Africa.
