

UNC Water and Health Conference 2015

Tuesday October 29
8:30 – 10:00 am
Windflower

KEEP THE WATER FLOWING: POST-CONSTRUCTION SUPPORT FOR RURAL WATER SERVICE PROVIDERS

We will provide an overview of post-construction methods being used around the world. Avina Foundation, DRI Center for International Water & Sustainability, IRC and Millennium Water Alliance will present case studies on post-construction support to rural water systems and data on how services have improved. Examples include Circuit Riders, supporting supply chains for spare parts, assisting local governments with monitoring and water quality testing.

Center for International
Water and Sustainability

Supporting water sanitation
and hygiene services for life
