Self-supply business catalogue

INTRODUCTION

In this catalogue you find businesses of entrepreneurs in the self-supply / WASH sector from Ethiopia. Together they offer a variety of services and products that individuals or households could purchase to secure their access to safe water and sanitation. All businesses are looking to consolidate or expand their business and offer quality services for households willing to invest in their own water or sanitation provision.

This catalogue was edited for the Self-supply business fair and seminar ‘My Water My business’ held from 19-21st March 2015 in Addis Ababa to promote local initiative and business to help all Ethiopian’s access safe water supplies. This event brings together Self-supply business initiatives and investors, potential business partners and support organisations like governments and NGO’s. Companies described in this catalogue will be present at the fair to showcase themselves and introduce their business propositions to the general audience and to potential new partners, to successfully scale Self-supply services to households in Ethiopia.

Each individual business sheet in this catalogue describes what the entrepreneur offers and what he is looking for. Have a look at the business propositions of entrepreneurs offering goods and services for Self-supply and discover how we can accelerate Self-supply in Ethiopia.

The Hague, The Netherlands
March 2015

This catalogue will be updated regularly and extended with more entrepreneurs, as part of the Self-supply acceleration program implemented by partners MWA, IRC and Aqua for All. Please send any updates or requests to change the contents to: M.Batterink@aquaforall.org

Selam Children’s village
Bishan Gari Purification industry is an African firm committed to increasing affordable access to potable water supply for all those who need it, by providing affordable and sustainable access to clean water. This is a local technology/innovation helping to provide equity and access to sanitation and hygiene.

**Business model**
- We provide Household Water Treatment Chemicals directly to end users, via pharmacies, whole sellers, NGO’s, different ministries and regional water bureaus.
- The market potential is fair / good. However, even though the actual situation/ the quality of water in the majority of rural households requires house hold water treatment, it seems that households do not take responsibility for their own drinking water (sleeping demand)

**Business targets**
- WASH training/ Awareness creation trainings on sanitation, hygiene and water safe storage/ annually for 30,000-50,000 people
- Sales: min.10 million sachets in the current year, and there after adding 15% from the preceeding sales which is totally estimated to be 17,490,000 sachets at the end of the 5th year each of which can treat 20 liters of unsafe water.

**Needs and purpose**
- A partner who can work on changing the attitude of the people/ demand creation
- A partner who can work as a local distributor/in regions
- A partner which can search markets in neighboring countries

**Management team**
Bishan Gari is owned by Ethiopian investors who are committed to work as a social entrepreneur. It is managed by a Management team comprising of different departments. It is an ISO 9001:2008 certified company.

---

**Stage of business proposition**
Full launch & growth

**What is in it for investors or potential business partners**
- Returns of sales like profit/ monetary and/or social, commission
- Getting shares will greatly depend on performance evaluation and associated market trend analysis

Dolphin Trading
SMS water filters, established in 2011, is offering Ethiopian produced affordable ceramic pot filters for household water treatment services. The ceramic silver water filter (CSF) is a point-of-use system based on a ceramic pot filter. These filters are produced by SMS silver filters in Mojoo Ethiopia and are more cost-effective than alternative water treatment options as chlorination or other filtration systems. The ceramic filters can also be used for efficient irrigation purposes, without the silver component.

Business model
- The company only produces ceramic pot filters at the moment.
- Currently 1500 filters are already produced and available. Customers are needed.
- There is a potential market for household water filters and pot irrigation.

Business target
- The company targets the rural areas, where NGO’s are engaged in water and health.
- Plan is to sell 5000 to 10.000 filters per year.

Needs and purpose
- We are looking for partners like NGO’s
- Financing partners / equity partners

Stage of business proposition

GEM Engineering PLC.
Sawyer produces hollow fibre membrane filters which are small, portable, easy-to-use, reliable, inexpensive, and can last a decade without needing to be replaced. Our filters are certified for ABSOLUTE microns making it impossible for harmful bacteria, protozoa, or cysts like E. coli, Giardia, Vibrio cholerae and Salmonella typhi (which cause Cholera and Typhoid) to pass through.

Business model
- Currently our business targets individuals, NGO’s regional water bureau (mainly Oromia).
- We see large market potential to distribute in bulk throughout the country.

Business target
- To have retail shops in all areas and meet the demand.

Needs and purpose
We are looking for partners:
- To finance us to enable us to import the products
- To promote the product and creating more awareness to the people
- To bring the technology and produce it in Ethiopia – resulting in less tax being paid during import process. Getting hard currency on time and as much as needed is now challenging.

Management team
Our business is managed by a general manager. We have about five professional staff members.

Stage of business proposition
Pilot / market entry

What is in it for investors or potential business partners
Depends on their participation. Becoming shareholder is a possibility. Also commission is possible for subagents.

Also looking for
Financing institutes which enables us to sell in credit, have enough stock in all areas, etc.

Business active in
Oromia, mainly: Arsi, west & east Hararghe, Welega, Bale, Shoa.

Can do business in
All over the country.

Oroma’s Self-help Organisation (OSHO) is a social enterprise, offering vital assistance in the implementation, distribution and monitoring of filters and in the realisation of household surveys on filter use and acceptance. OSHO’s Fluoride Removal Technology centre focusses on the delivery of fluoride removal products and services in the communities living in fluoride affected areas. We deliver either directly or indirectly via partners.

Business model
- Fluoride is a major challenge related to water in the Rift Valley. All regions located in the Rift valley are potential markets for us.
- **Products:** Sales of Household and community fluoride filters + Fluoride filter media (Bone char, Hydroxyl apatite)
- **Services:** Water quality test, Training, Consultancy

Business target
- The business plan is under revision. So far OSHO addressed 30,000 people within 4 years.
- The future plan is to increase that through involvement of stakeholders.

Needs and purpose
We are looking for partners like government sectors, NGO’s, private sector and micro finance groups. Also we would like to connect with research institutes.

Management team
The business is owned by the Oroma Self Help Organisation as a social business, using the opportunity that NGO’s can get involved in Income Generating Activities. The centre has its own management under the organisational management.

**Stage of business proposition**
Full launch & growth

**What is in it for investors or potential business partners**
Market, partnership.

**Also looking for**
Supporting the community on access to finance, promoting the technology and working in collaboration.

**Business active in**
Special emphasis on Oromia region (east Showa, Adama, Bora, Dugda)

**Can do business in**
SNNPR, Afar

Mercimoy industry and commerce PLC

OUR Manufactured Products:
- UPVC Pipes Dim 20-40MM
- PVC Pipes Dim 20-40MM
- HDPE Pipes Dim 20-110
- P.P.R Pipes Dim 20-100
- Flexible Hose Dim 20-32MM
- Conduits Dim 20-32MM

OUR Imported Products:
UPVC, PVC, HDPE, PPR Fittings and accessories

To our esteemed customers,

Mercimoy Industry & Commerce PLC is established in 2011 by Ethiopian shareholders having over a decade experience in the trading business of plastic pipes and fittings. The head office is located in Addis Ababa, 21 masosna.

In 2012, the company has started a plastic extrusion factory near Alemeina town having a production capacity of 2550 metric tons of UPVC, HDPE, and PPR pipes. Currently, it is working in three shifts, creating employment opportunities for 45 permanent and temporary workers, and also launched its 1st expansion program to increase the production capacity by 1200 metric tons of UPVC pipe.

We use state-of-the-art machinery to manufacture our pipes. We produce UPVC pipes ranging from 35mm to 125mm outside diameter and pressure range (PR) of 4bar-20bar based on ISO 4422 and DIN 8071. We also manufacture HDPE pipes ranging from 20mm up to 110mm outside diameter and pressure range (PR) of 4bar-20bar. In our 3rd production line, we manufacture PPR pipes ranging from 20mm up to 63mm outer diameter and pressure range (PR) of 10 & 20 bar.

The range of products as mentioned above are used for potable water supply for sewage and for irrigation and construction. The raw materials used for the production of pipes are imported from well-known suppliers who have long-term experience in the polymer industry like UC-Chem of Korea and Bracouge of UAE.

We are also importing and supplying good quality PVC, HDPE & PPR fittings together with our pipes.

We are ISO certified company along with the implementation of a systematic quality management system in our organization. We have established a conducive working environment for our customers through providing quality products at competitive price, fast delivery, and meeting their specific requirements.

Visit us, we will serve you best. We are at your disposal at all the time. Inform us our shortcomings, we are open to hear complaints and correct them to satisfy our customers.
We are an experienced metal workshop. We produce rope pumps and fuel efficient cook stoves. Next to that we currently produce housing furniture, like doors, windows and any other metal works.

Business model
- Our main customers are the regional water bureau, water offices from the government.
- There is a large potential as the government is planning to procure large numbers of rope pumps.
- Currently no capacity to join this procurement but we are teaming up with colleague RP producers to prepare ourselves.

Business target
- Scale up to rural areas in the region.
- Diversification by producing other products like treddle pump, coffee roasting machines and also by installing pumps and doing Operation and Maintenance ourselves.

Needs and purpose
- Looking for supply chain partners to assist in raw material supplies, as we need quality materials.
- Also looking for access to finance (MFI) for working capital/ machinery / supplies.

Management team
We are a family PLC, managed by Mr Getachew.

Tulip Addis imports water filters which have a high quality filter element, the Tulip technology, which is made of diatomaceous earth, treated with nano silver to avoid growth of algae and to avoid recontamination of the filtered water. The filter element contains activated carbon to remove colour and improve taste. This combination ensures that even turbid and highly contaminated water becomes safe and attractive to drink. There is a removal of harmful bacteria of 99.995%, turbidity removal of 99% and protozoa removal of 99%. This helps to prevents water borne diseases like diarrhoea, cholera, giardia, cryptosporidiosis, typhus and schistosomiasis.

Business model
- Import, assemble (in the near future), marketing and sales water filters. The three main products in the Tulip-family are the siphon filter, table top filter and the group filter.
- Current customers are governments, the NGO community, rural communities and refugees.

Business target
- Expand current market (potential is good), targeting mainly NGO’s, government institutions at different levels and both rural and urban communities through local sub-agents.

Needs and purpose
- Mainly Tulip Addis is looking for the following partners: microfinance institutions and international and local NGO’s.

Management team
Tulip Addis is working with a General Manager, with sales and marketing managers, through a sales representative office and sub-agents.

Stage of business proposition
Mature and expansion

What is in it for investors or potential business partners
Distributor/sales %

Also looking for
- Awareness creation by government.
- Tax-free import possibility

Tulip Addis
iDE is an international non-profit organization which has the mission to create income and livelihood opportunities for poor rural households. iDE uses a market-oriented development model that has been developed over more than 30 years by listening and responding to the rural poor (our customers). Our approach is empowering - instead of hand-outs or subsidies. Established in 2007, iDE Ethiopia has been constantly evolving and expanding its approach to help solve the problems that are keeping rural families in poverty.

Business model
- We focus on providing farmers with access to the technologies, inputs, and support services they need to earn increased productivity and income through effective and sustainable use of their own resources (labour, land and water).
- We are working to achieve iDE's mission through a wide variety of activities and strategies throughout the country.
- There is a huge market for water lifting and drilling technologies for Self-supply and small scale irrigation purposes.

Business target
Our target is to reach 75,000 households by 2017 and currently we reached 54,000 households already.

Needs and purpose
We are looking for implementing partners, potential private business, potential donors and international volunteers in area of water supply, sanitation and rural development.

Stage of business proposition
Mature and expansion

What is in it for investors or potential business partners
While we are working with potential businesses, iDE's role will be giving training on different types of water lifting and drilling technologies, establishing the supply chain and facilitating the market.

Business active in
Oromia, SNNPR, Amhara and Tigray regions

Can do business in
All regions of Ethiopia.
